INTRODUCTION

The **College Tech Fest 2026** is a simple web development project created using **HTML and CSS**, with basic **JavaScript** for registration functionality only. The main purpose of this website is to provide information about a college technical event in an organized and user-friendly manner.

The website contains different sections such as **Home, Event, Schedule, Speakers, Register and Contact**. A navigation bar is provided at the top of the page to help users easily move between different sections of the website.

The Home section welcomes users to the College Tech Fest and displays the event theme. The Event section provides details such as the **date, time and venue**. The Schedule section displays the different activities of the event using a table. The Speakers section provides information about the invited speakers and their areas of expertise.

The Register section contains a simple registration form where users can enter their **name, email and department**. Basic JavaScript is used to display a registration successful message when the form is submitted. The Contact section provides the event email address and phone number.

The project mainly focuses on using **basic HTML elements, CSS styling, navigation links, tables, forms and simple JavaScript** to create a complete and functional college event website.

INPUT CODE

```
<html>
<head>
  <title>Responsive College Event Page</title>
  <style>
    body {
      font-family: Arial;
      margin: 0;
      background-color: #e8e4e6;
    }

    header {
      background-color: #9c5b87;
      color: rgb(19, 3, 3);
      text-align: center;
      padding: 20px;
    }

    nav a {
      color: white;
      margin: 10px;
    }

    .banner {
      background-color: rgb(179, 135, 157);
      text-align: center;
      padding: 50px;
    }

    section {
      background-color: white;
      margin: 20px;
      padding: 20px;
    }

    h2 {
      color: #333;
    }

    table {
      width: 100%;
      border-collapse: collapse;
    }

    th, td {
      border: 1px solid black;
      padding: 10px;
      text-align: center;
    }

    th {
      background-color: lightblue;
```

```

    }

    .speaker {
        border-radius: 24px;
        background-color: #eeeeee;
        padding: 9px;
        margin: 4px;
    }

    form {
        display: flex;
        flex-direction: column;
        width: 300px;
    }

CONCLUSION

The **College Tech Fest 2026 website** was successfully designed using basic **HTML, CSS and JavaScript**. The project helped in understanding how different HTML elements can be combined to create a complete and well-organized event website. Sections, headings, paragraphs, navigation links, tables, forms and basic JavaScript were used to present the event information clearly.

CSS was used to improve the appearance of the website by adding **colors, spacing, borders, alignment and styling** to different sections.

The website provides a simple and comfortable way for students and visitors to view information about the college tech fest. The Home section gives an introduction to the event, while the Event, Schedule and Speakers sections provide useful information about the program.

The Register section also allows users to enter their details through a simple registration form, and JavaScript displays a successful registration message after submission. Overall, this project provided practical knowledge of basic web development concepts and helped in understanding how **HTML, CSS and JavaScript** can be used together to create a simple and functional college event website.
