INTRODUCTION

The **My Portfolio Website** is a simple web development project created using **HTML, CSS and JavaScript**. The main purpose of this website is to provide basic information about the student, their projects, skills and contact details in an organized manner.

The website contains different sections such as **Home, Projects, Skills and Contact**. A navigation bar is provided at the top of the page to help users easily move between the different sections.

The Home section introduces the student, while the Projects section displays different projects using simple cards. The Skills section lists the technical skills such as **HTML, CSS, Python, SQL and Power BI**. The Contact section contains a simple form where users can enter their name, email and message.

CSS is used to improve the appearance of the website by adding **colors, spacing, borders, hover effects and alignment**. Basic JavaScript is used to display a message when the contact form is submitted.

INPUT CODE

```
<html>
<head>
  <title>My Portfolio</title>
  <style>
    body {
      font-family: Arial;
      margin: 0;
      background-color: #b7a4b7;
    }
    header {
      background-color: #333;
      color: white;
      text-align: center;
      padding: 20px;
    }
    nav a {
      color: white;
      text-decoration: none;
      margin: 15px;
    }
    .welcome {
      text-align: center;
      padding: 30px;
      animation: move 2s;
    }
    .projects {
      display: grid;
      grid-template-columns: repeat(3, 1fr);
      gap: 20px;
      padding: 20px;
    }
    .card {
      background-color: white;
      padding: 20px;
      text-align: center;
      border: 1px solid black;
      transition: 0.5s;
    }
    .card:hover {
      background-color: lightblue;
      transform: scale(1.05);
    }
    .skills {
      background-color: white;
      margin: 20px;
      padding: 20px;
    }
  </style>
</head>
```

```

    form {
        background-color: white;
        padding: 20px;
        margin: 20px;
    }
    input, textarea {
        width: 90%;
        padding: 10px;
        margin: 8px;
    }
    button {
        background-color: #333;
        color: white;
        padding: 10px 20px;
        border: none;
        transition: 0.5s;
    }
    button:hover {
        background-color: rgb(108, 108, 164);
    }
</style>
</head>

<body>

<header>
    <h1>My Portfolio</h1>

<form id="contact">
    <label>Name:</label>
    <input type="text" placeholder="Enter your name"><br><br>

    <label>Email:</label>
    <input type="email" placeholder="Enter your email"><br><br>

    <label>Message:</label>
    <input type="text" placeholder="Enter your message"><br><br>

    <button type="submit">submit</button>
</form>

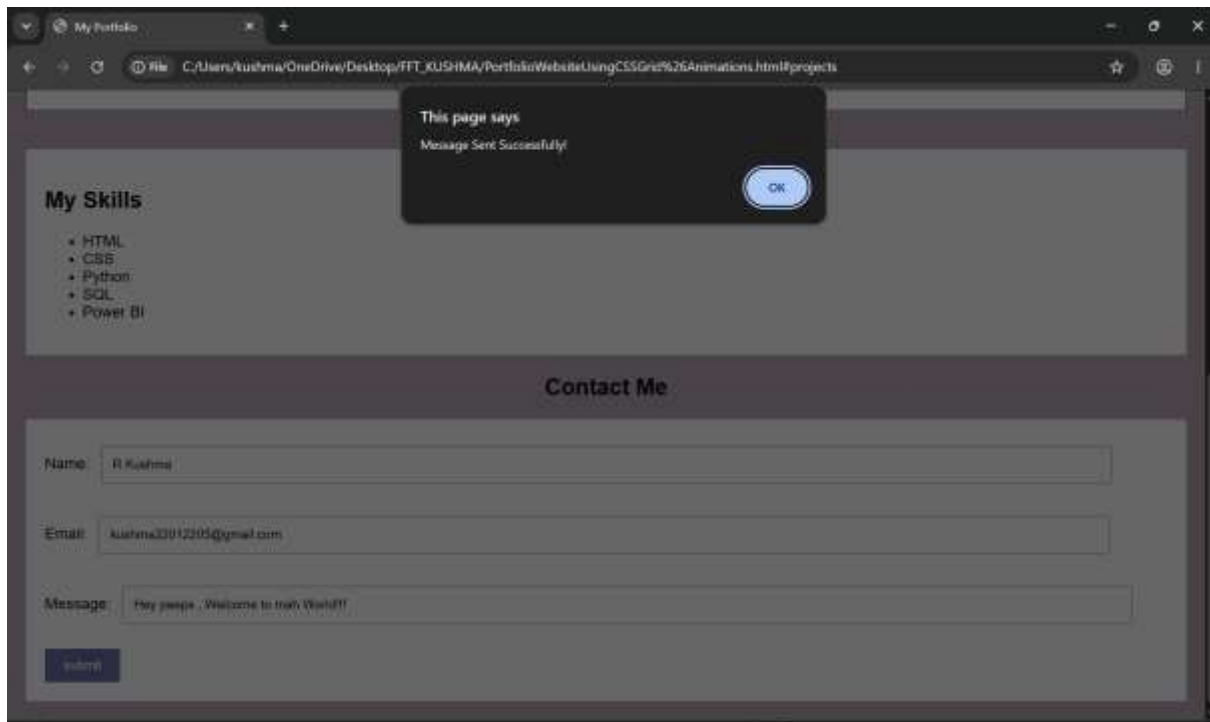

<script>
    document.getElementById("contact").onsubmit = function(event) {
        event.preventDefault();
        alert("Message Sent Successfully!");
    };
</script>

</body>
</html>

```

OUTPUT CODE

CONCLUSION

The **My Portfolio Website** was successfully designed using basic **HTML, CSS and JavaScript**. The project helped in understanding how different HTML elements can be combined to create a simple and well-organized personal website.

Sections, headings, paragraphs, navigation links, lists, project cards and forms were used to present the information clearly.

CSS was used to improve the appearance of the website by adding **colors, spacing, borders, alignment, hover effects and transitions**.

The website provides a simple and comfortable way for visitors to view information about the student, projects and technical skills. The Contact section also allows users to enter their details through a simple form.

Overall, this project provided practical knowledge of basic web development concepts and helped in understanding how **HTML, CSS and JavaScript** can be used together to create a functional and attractive portfolio website.
