INTRODUCTION

The **Student Result Dashboard** is a simple web-based project developed using **HTML, CSS and JavaScript**. The main purpose of this project is to display and manage a student's academic details, subject-wise marks and overall result in an organized dashboard.

The webpage provides a simple and user-friendly interface where the student's name, register number and course details are displayed. It also shows marks for subjects such as **HTML, CSS, JavaScript, Database and Data Structures**.

HTML is used to create the structure of the webpage, including headings, navigation links, sections, buttons and result details. CSS is used to provide basic styling, colours, spacing, boxes and layout to make the dashboard attractive and easy to use. JavaScript is used to provide interactive features such as searching for a student and submitting the result.

The dashboard displays the **total marks, average, percentage, grade and pass/fail status**, along with a performance summary showing the highest and lowest marks. It also includes a search function to check whether the student is available and a Submit button to display a successful submission message.

INPUT CODE

```
<html>
<head>
  <title>Student Result Dashboard</title>

  <style>
    body {
      font-family: Arial;
      margin: 0;
      background-color: #f3e8f0;
    }

    header {
      background-color: #7b2d5f;
      color: white;
      text-align: center;
      padding: 20px;
    }

    nav a {
      color: white;
      margin: 10px;
      text-decoration: none;
    }

    nav a:hover {
      color: #ffd6eb;
    }

    section {
      background-color: white;
      margin: 20px;
      padding: 20px;
    }

    h2 {
      color: #7b2d5f;
    }

    .box {
```

```

        background-color: #f5e6f0;
        padding: 10px;
        margin: 5px;
        border: 1px solid #866073;
    }

    button {
        background-color: #7b2d5f;
        color: white;
        padding: 10px 20px;
        border: none;
        cursor: pointer;
    }

    button:hover {
        background-color: #5e2048;
    }

    input {
        padding: 8px;
        margin: 5px;
        border: 1px solid #9c5b87;
    }

    #searchResult {
        color: green;
        font-weight: bold;
    }

    #submitResult {
        color: #7b2d5f;
        font-weight: bold;
    }
</style>
</head>

<body>

    <header>
        <h1>INTERACTIVE STUDENT RESULT DASHBOARD</h1>

    <nav>
        <a href="#details">Student Details</a>

```

```

        <a href="#marks">Marks</a>
        <a href="#result">Result</a>
        <a href="#summary">Summary</a>
    </nav>
</header>

<section id="details">
    <h2>STUDENT DETAILS</h2>

    <div class="box">
        <p><b>Name:</b> R - Kushma</p>
        <p><b>Register Number:</b> 101</p>
        <p><b>Course:</b> MCA</p>
    </div>

    <input type="text" id="search" placeholder="Search Student">
    <button onclick="searchStudent()">Search</button>

    <p id="searchResult"></p>
</section>

<section id="marks">
    <h2>SUBJECT-WISE MARKS</h2>

    </div>

    <div class="box">
        <p><b>Data Structures:</b> 82</p>
    </div>

```

</section>

<section id="result">

<h2>RESULT</h2>

<div class="box">

<p>Total Marks: 413</p>

</div>

<div class="box">

<p>Average: 82.6</p>

</div>

<div class="box">

<p>Percentage: 82.6%</p>

</div>

<div class="box">

<p>Grade: A</p>

</div>

<div class="box">

<p>Status: PASS</p>

</div>

</section>

<section id="summary">

<h2>PERFORMANCE SUMMARY</h2>

<div class="box">

<p>Student has performed well in all subjects.</p>

</div>

<div class="box">

<p>Highest Mark: Database - 88</p>

</div>

<div class="box">

<p>Lowest Mark: JavaScript - 78</p>

</div>

<button onclick="submitResult()">Submit</button>

```
<p id="submitResult"></p>
</section>

<script>

function searchStudent() {

    var name = document.getElementById("search").value;

    if (name == "R - Kushma" || name == "Kushma") {
        document.getElementById("searchResult").innerHTML =
            "Student Found: R - Kushma";
    }
    else {
        document.getElementById("searchResult").innerHTML =
            "Student Not Found";
    }
}

function submitResult() {

    document.getElementById("submitResult").innerHTML =
        "Result submitted successfully!";
}

</script>

</body>
</html>
```

OUTPUT CODE

The screenshot shows a web browser window with the title "Student Result Dashboard". The address bar shows the file path: "C:/Users/kushma/OneDrive/Desktop/FFT_KUSHMA/interactiveResultDashboard.html". The dashboard has a purple header with the title "INTERACTIVE STUDENT RESULT DASHBOARD" and a navigation menu with links: "Student Details", "Marks", "Result", and "Summary".

The main content area is divided into four sections:

- STUDENT DETAILS:** A form with fields for Name (R. Kishore), Register Number (101), and Course (MCA). Below these fields is a "Search Student" button.
- SUBJECT-WISE MARKS:** A table with five rows showing marks for different subjects: HTML (85), CSS (88), JavaScript (78), Database (88), and Data Structures (82).
- RESULT:** A table with five rows showing summary statistics: Total Marks (413), Average (82.6), Percentage (82.6%), Grade (A), and Status (PASS).
- PERFORMANCE SUMMARY:** A table with three rows showing performance feedback: "Student has performed well in all subjects", "Highest Mark: Database - 88", and "Lowest Mark: JavaScript - 78". Below this table is a "Submit" button.

CONCLUSION

The **Student Result Dashboard** project successfully provides a simple and organized way to display a student's academic performance. The project combines **HTML** for webpage structure, **CSS** for styling and **JavaScript** for interaction.

The dashboard displays the student's details, subject-wise marks and overall result, including the **total marks, average, percentage, grade and pass status**. It also shows the highest and lowest marks to give a quick summary of the student's performance.

The use of JavaScript functions such as `searchStudent()` and `submitResult()` provides interactive features. The search function checks whether the entered student name matches the available student details, while the Submit button displays a successful submission message.

This project helped in understanding important concepts such as **HTML sections and navigation, CSS styling, JavaScript functions, DOM manipulation, button events, conditional statements and user input handling**. It provides a basic understanding of how HTML, CSS and JavaScript work together to create an interactive student result dashboard.
