INTRODUCTION

The Resume Website is a simple web development project created using **HTML, CSS and Node.js**. The main purpose of this website is to present personal, educational and professional information in an organized and user-friendly manner. The website provides a digital version of a resume that can be accessed through a web browser.

The website contains different sections such as **Profile, Education, Technical Skills, Projects, Certifications, Internship, Achievements and Contact**. A navigation bar is provided at the top of the page to help users easily move between different sections of the resume.

The Profile section introduces the candidate and career interest. The Education section provides details about academic qualifications. The Skills section displays technical skills such as Python, HTML, CSS, JavaScript, MySQL and Power BI. The Projects, Certifications, Internship and Achievements sections provide information about academic projects, certifications, training experiences and accomplishments. Finally, the Contact section provides email, phone number, location and a **Download Resume** option.

The project mainly focuses on using **HTML elements, CSS styling, navigation links, sections, buttons and downloadable files** to create a simple and complete resume website. **Node.js** is also used to create a basic web server that reads and displays the HTML resume in the browser using a local server.

INPUT CODE

Node app.js code:

```
let a = 10;
let b = 100;
console.log("sum of a,b:"+(a+b));

const fs = require("fs");
fs.writeFileSync("resumewithcss.html", "This is a simple resume website with CSS styling.");
console.log("File Created...");

const os = require("os");
console.log(os.platform());
```

sample file creation html code:

```
<html>
  <head>
    <title>RESUME WITH CSS STYLING</title>
  </head>
  <body>
    <h1>RESUME WITH CSS STYLING</h1>
  </body>
</html>
```

Node Server.js code:

```
const http = require("http");
const fs = require("fs");

const server = http.createServer((req, res)=>
{
  fs.readFile("resumewithcss.html", (err, data)=>{
    res.end(data);
  });
});

server.listen(2000);
console.log("http://localhost:2000");
```

HTML + CSS Code:

```
<html>
<head>
  <title>My Resume</title>

  <style>
    body {
      font-family: Arial;
      margin: 0;
      background-color: #e8e4e6;
    }

    header {
      background-color: #9c5b87;
      color: white;
      text-align: center;
      padding: 20px;
    }

    nav {
      margin-top: 15px;
    }

    nav a {
      color: white;
      margin: 8px;
      text-decoration: none;
    }

    nav a:hover {
      text-decoration: underline;
    }

    section {
      background-color: white;
      margin: 20px;
      padding: 20px;
    }

    h2 {
      color: #333;
      border-bottom: 2px solid #9c5b87;
      padding-bottom: 5px;
    }

    .box {
      background-color: #eeeeee;
      padding: 10px;
      margin: 8px 0;
    }

    button {
      background-color: #333;
      color: white;
```

```

padding: 10px 15px;
border: none;
cursor: pointer;
}

button:hover {
background-color: #9c5b87;
}
</style>
</head>

OUTPUT CODE

CONCLUSION

The Resume Website project provides a simple and organized way to display personal, educational and professional information online. By using **HTML**, the structure and content of the resume were created, while **CSS** was used to provide basic styling, colors, spacing and layout.

Node.js was used to create a basic server that loads the resume website and makes it accessible through localhost. The project also includes a working **Download Resume** button that allows the user to download the resume PDF.

Overall, this project helped in understanding the basic concepts of **HTML, CSS and Node.js**, including webpage structure, styling, navigation, file handling and creating a simple web server.
